The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?".It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them..wake, but at times ranges to the left and right of her..--just inside the base. "Nobody knew?".Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..Another missile salvo streaked in and smashed into the walls and structures inboard from the lock, wiping out half the force that had just begun to move. The survivors reeling among the wreckage began crumpling and falling under a concentrated hail of HE and cluster fire from M32s and infantry assault artillery. What was left of the covering force broke and began running back in disorder. "Get everybody out!
